HOW MIGHT WE (HMW) DEVELOPMENT FORM

*Note to client: Identify a challenge and describe it in the form below.
Please provide this to the community meeting coordinator.*

Describe a meaningful challenge that you are facing in your classroom or school.

When thinking of your design challenge, consider the following:

- What is the need that you are trying to meet?
- Who are the people directly involved and/or impacted?
- Why is this challenge important to you?
- Is the challenge balanced? Ideally, your challenge will be broad enough to invite a wide range of possible solutions, yet narrow enough to have realistic boundaries. For example:
 - o How might we create a cone to eat ice cream without dripping? (*too narrow*)
 - o How might we redesign dessert? (*too broad*)
 - o How might we redesign ice cream to be more portable? (*balanced*)

After choosing a challenge, enter it in a How Might We statement. Use the following statements as examples for creating your How Might We statement.

- How might we help (achieve some goal)?
- How might we redesign the (situation) experience?
- How might we design a way for (person/group) to better (situation)?

Enter your How Might We statement in the box below:

How Might We ...
